New York, NY | (470) 905 6566 | abhishekp98@outlook.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Finance and operations professional with a Master's in Analytical Finance coupled with a Computer Science Engineering foundation. At SMBC, I build the analytical and operational backbone for banking and capital markets oversight & monitoring - financial models and leadership reporting on one side, Python/SQL pipelines and documented systems replacing manual workflows on the other. Hands-on builder of AI-native tools, with automation cutting reporting latency by 90% in high-volume environments.

EXPERIENCE

SUMITOMO MITSUI BANKING CORPORATION

New York, NY

Associate, Business Control Office

Sep 2023 – Present

- Designing a Python ETL pipeline for CLO origination that standardizes 60+ collateral manager data schemas into a single canonical output, with a banker-editable mapping table, SHA-256 audit hashing, and timestamped output folders, replacing a fully manual, error-prone tape-processing workflow.
- Automated 100% of trader mandate monitoring across Capital Markets, Fixed Income, Equities, and Treasury FX desks using Python, enabling enterprise-level daily mandate checks for front-office and middle-office teams.
- Built an end-to-end Python workflow automating monthly transaction-fee reconciliation across Excel, PDF, and operational data sources, with exception handling replacing manual account-level validation.
- Translated manual control reviews into documented, automated systems across FY24-FY26: 200+ Front Office key controls tested and monitored. Additionally, 10,000+ controls reviewed to identify Key Controls based on the relevant business risks.
- Established automated population-based testing for Credit Approval and Maker/Checker processes, achieving 100% quarterly coverage and eliminating manual settlement checks.
- Eliminated all manual work in WSP overdue reporting by building a Python pipeline extracting data directly from legacy system email notifications, delivering Excel-ready reports for senior management.
- Architected an interactive Power BI dashboard suite for the COO and MD-level review, using Python-driven ETL to merge disparate datasets into Business Unit-level trend analysis across FY23-FY26.

CYGNET INFOTECH

Ahmedabad, India

Business Analyst

Dec 2021 – May 2022

- Drafted business and functional requirements, performed competitor analysis, and coordinated delivery of fintech analytics solutions.

ACCELERATION GROUP INC.

New York, NY

Business Intelligence Consultant

Apr 2021 – Aug 2021

- Led client consultations to define performance KPIs and built Tableau dashboards for real-time revenue and sales analytics.

SELECTED PROJECTS

THE BROKE ANALYST - AI Native Equity Research Platform

2026

- Building a Bloomberg-style research platform for retail investors: SEC EDGAR data warehouse on PostgreSQL, PySpark pipelines computing derived financial ratios across companies, and multi-provider LLM integration with ontology-driven design.

FPL COPILOT - Agentic Analytics on Palantir Foundry

2025

- Developed an AI decision-support agent on Palantir Foundry combining PySpark ML pipelines, ontology modeling, and AIP-based LLM workflows for weekly optimization decisions under constraints.

INVESCO x GOIZUETA STRATEGY PROJECT

2023

- Developed a Python-based ARIMA model for an active investment strategy achieving a 0.74 Sharpe Ratio and 0.55 Information Ratio; evaluated ESG factors, volatility, and upside potential against BlackRock's IYW benchmark.

EDUCATION

MONROE UNIVERSITY, KING GRADUATE SCHOOL OF BUSINESS

New York, NY

MBA, Finance (in progress)

June 2026 - April 2028

EMORY UNIVERSITY, GOIZUETA BUSINESS SCHOOL

Atlanta, GA

Master of Analytical Finance - GPA 3.7/4

Aug 2022 - May 2023

MANIPAL UNIVERSITY

Jaipur, India

B.Tech, Computer Science and Engineering - GPA 3.5/4

Aug 2016 - Jul 2020

SKILLS

Financial modeling & forecasting | Python, SQL, VBA, PySpark | Power BI, Tableau, Excel | AI & automation tooling (Claude Code, Codex, Cursor; LLM API integration) | Process design & SOP documentation | PostgreSQL, Palantir Foundry
